

VR Training module details

Module: High Voltage Electrical Substation

Training overview

Through exploring a virtual substation environment, this training will help participants become more familiar with the layout of industry-specific equipment, power transformers, oil circuit breakers, re-closers, switchyard, and switchgear.

Training details:

Category:	Power Grids & Utilities
Learning objectives:	MV substation layout, Power Transformers, Group Operated Air Break Switches, Disconnectors, Cts and Vts
Target audience:	College, Trade school, Employee onboarding
Duration:	20 min
Training modes:	Single user
Assessment and Feedback:	No assessment
Available on:	Quest 2, Quest 3, Quest Pro, Pico 4
Languages:	English
